	Examiner ANDREW W. SUTTON	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/22/08 has been entered.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 6-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant amended claim 1 to include the

pulley cords of the upper row are shorter than those of the lower row that was not previously disclosed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gheysen (US 5,353,846). Gheysen illustrates in Fig. 3 a jacquard device including two or more set of hooks with each set including complimentary hooks (29, 30) that operates in conjunction to a pulley 21 with complementary hooks (29,30) of one set of hooks operating in conjunction with one pulley 21. Gheysen illustrates a grid of 3 by 2 sets of pulleys with two complementary hooks operating each pulley. It is inherent that when the complementary hooks (29,30) of Gheysen are raised and lowered by knives 60, it will create a group of upper and lower pulleys as claimed. The device would be capable of having the upper row continuously as it could be left in that configuration. Gheysen does not explicitly teach the use of the shorter pulley cords as claimed. It would have been obvious to one of ordinary skill in the art to provide a shorter pulley cord for the pulley in the upper position as it is an equivalent way of providing the pulley in the upper position.

As to claim 6, Gheysen illustrates (Fig. 3) a single element, knife 60, to take multiple sets of hook on selection.

As to claim 7, Gheysen discloses (Col. 1 line 43) that the jacquard is a three position loom.

As to claim 8, Gheysen discloses (Col. 1 line 6) that the device disclosed is for a jacquard machine (loom).

Allowable Subject Matter

Claims 2-5 are allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANDREW W. SUTTON whose telephone number is (571)272-6093. The examiner can normally be reached on Monday - Thursday 8:00-6:00.
